

Yuvraj Soni.

Web Developer & Designer.

yuvrajsoni92@gmail.com

Summary

Hello, my name is Yuvraj. I am a Web Expert living in Rajasthan, India. Experienced in web designing & developing. Several years of experience in wide range of design disciplines focusing on user interaction and user experience. Currently working as an Entry Level Freelancer Web Developer & Web designer. In the spring 2013, during my first year of college at MISU University Udaipur (Raj.) India. I took a general PHP course where we were assigned the task of building a webpage in Word. Thus began my love affair with coding & designing.

UI/UX DESIGN:-

UI/UX involves planning and iterating a site's structure and layout. Once the proper information architecture is in place, I design the visual layer to create a beautiful user experience.

FRONT END DEVELOPMENT:-

Front End Development is building out the visual components of a website. Using HTML, CSS, and Javascript, I build fast, interactive websites. This also may include integrating a CMS.

Code:-

I design in the browser with HTML(5), CSS(3) and a touch of JavaScript. I love coding things from scratch, but I can work with front-end frameworks like Bootstrap too.

Ideas:-

I collaborate with clients and peers to nurture and transform ideas into well thought out design specs. After all, that's where the majority of amazing user experiences start.
